EDUCATION

New Jersey Institute of Technology — Ying Wu College of Computing — Newark, NJ

BS Management Information Systems (M.I.S., Bachelors) | Minors: Computer Science, Psychology — *Expected May 2029*

Honors: Deans List

Involvement: ColorStack, ACM Web Committee, Entrepreneurship Society, SOMA

TECHNICAL SKILLS

Languages: Python, TypeScript, Java, SQL, HTML/CSS
Frameworks & Libraries: React, Next.js, React Native, FastAPI, Uvicorn
Platforms & Tools: Docker, Git, GitHub Projects, Microsoft Power Automate, Copilot Studio, SharePoint, REST APIs, LLM API integration (Anthropic Claude, OpenAI), Cloudflare Pages
Product & Process: Agile / sprint planning, backlog prioritization, user research, requirements discovery, release QA

PROFESSIONAL EXPERIENCE

Orion Resource Partners — New York, NY

IT Intern — Project Lead + Internal Tools & AI Automation — *May 2026 – Aug 2026*

Stack: React, TypeScript, FastAPI, Python, Docker, Claude API, Power Automate, Copilot Studio, SharePoint

- Built a web app **converting 10+** mixed-format reports per cycle (PDF, DOCX, PPTX, JSON, MD; 5–200 pages) into company branded decks, matching keywords and image placeholders to one of **30+ hard coded slide** layouts, a prior problem that had been written off as infeasible.
- **Cut 17 hours a week** of manual formatting by parsing uploads through a python script for token efficiency, then routes to an in-app Claude chat where users shape the deck script before any slide is built; shipped to internal production in Docker.
- Joined the ESG extraction project mid-build, took over as lead, and **migrated a 300+ file Python script** to Power Automate and Copilot Studio, both **self-taught in 2 days.**
- Rebuilt as a three-stage agent workflow controlled by an Excel column, user selects the **company (out of 500+)** and which steps to run; **agents research 5–8 documents** each, parse them for target data, then extract a second data set.
- Cut a full run **from 28+ hours to 11** while increasing accuracy and took a 5-month manual process **down to 1–2 weeks of monitoring**; **directed 3 interns** across a cross-functional workflow and ran requirements surveys directly with end users stakeholders.
- **Built 3 Copilot agents** in constant internal use: SharePoint intake auto-renames and categorizes on upload, a conversational agent answers questions about recent additions with sourcing back to origin files, and a meeting agent turns Teams transcripts into summaries with emailed action reminders.

TECHNICAL PROJECTS

StudyNeant — Student Productivity Web Suite | Next.js, TypeScript, React — Mar 2025 – Present

Product, Design, Roadmap & QA Lead

- Own product direction, Creation, and UI on a two-person team building a notes, GPA calculator, calendar, to-do, and dashboard and more suite; **maintains a 70+ item backlog** prioritized by module and **P0/P1/P2 severity** within GitHub Projects, scoped in sprint milestones.
- Ran user surveys and requirement gathering with **over 300 target students** to define and prioritize MVP feature set; currently driving pre-launch backlog toward a high-school pilot.

Musical Portfolio — Freelance Client | Next.js, TypeScript, CSS Modules, React, Cloudflare Pages — Aug – Sept 2026

- Scoped, built, and shipped a paid client site as a fully prerendered Next.js app **with 3 runtime dependencies**: coverflow carousel, theme system, and a nav drawer hand-built rather than imported.
- Enforced content correctness at compile time: utilizes throws during build for duplicate slugs and single hero works, so an error content entry fails the build rather than reaching production; all content data files connected by one module boundary, ready for CMS migration.

LEADERSHIP & PERFORMANCE

Hawthorne Caballeros — Drum Corps International | Lead Trumpet, Brass — 2026 Season

- Selected from a national audition pool for a DCI All-Age corps; sustained **16+ hours** of weekly rehearsal alongside a full course load (5 classes) and a concurrent internship.

NJIT Wind Ensemble — Lead Trumpet, Section Leader, Soloist — Sept 2025 – Present

- **Direct an 11-member** trumpet section and perform as featured soloist **across 4+ concerts**, running sectionals and executing live performances.

NJIT Private tutor — Classical Trumpet Teacher — Sept 2026 – Present

- Private 1 on 1 tutor for currently 6 students. Teaching a mixture of Classical/Jazz playing, Music theory and much more.
